S.1 Admission, Orientation Activities & Healthy School Life

Secondary One Admission

Our school will accept discretionary places. Our school will participate in the Secondary School Places Allocation System through central allocation stage (Applicable for admission to S.1 in September 2026).

Admission Criteria and Weightings for Secondary One Discretionary Places are as follows:

1. Performance in Primary School: Academic Results (50%), Conduct (20%), Extra-curricular Activities (10%)
2. Interview Performance: Including communication skills, general knowledge, politeness and tidiness (20%)

Orientation Activities and Healthy Life

1. Parents' Day
2. 2-week Summer Orientation Course in summer holiday

The school strengthens physical training in planning co-curricular activities for students. A dedicated committee comprising of parents, teachers and students is formed to oversee the quality control of lunch supplier; and organize scheduled health talks to remind students the importance of balanced diet and regular exercise. An Environmental Protection Ambassador Programme is implemented to raise students' awareness on school hygiene and environmental protection.

School Characteristics
School Management
School's Major Concerns: 1. To deepen students' national identity, cultivate global citizenship awareness, and create a positive atmosphere on campus. 2. To enrich diverse learning experiences and broaden students' horizons. 3. To improve the administrative system, optimize the self-evaluation mechanism and improve the effectiveness of learning and teaching.
School Management Organisation: A Consultative Committee comprising of school board members and teaching staff has been set up to address various issues and concerns. The School Administration and Improvement Team has engaged two elected teaching staff as members in order to enhance the transparency of school policy and facilitate the full implementation of school-based management.
Incorporated Management Committee / School Management Committee / Management Committee: Formed by professionals, the IMC fully performs its advisory and supervisory functions.
School Green Policy: An Environmental Education Group has been established to oversee all works on environmental protection in school. Environmental Protection Ambassadors are trained to help launch EP-related activities.
Learning and Teaching Plan
Whole-school Language Policy: The school stresses uplifting students' English standard. We have introduced a Language-Across-Curriculum policy. We provide students with a variety of opportunities for using English. We have employed a number of NET teachers to enhance students' communication skills in English. Resources have been deployed to offer students extra English courses to cater their learning diversity. Small-group teaching is enforced. This academic year, 39 small-class teaching groups have been established for English classes in all forms with the aim of enhancing teaching and learning effectiveness. To enhance students' oral English proficiency, the school has added 22 extra small-group sessions to the English speaking classes, aiming to provide students with more opportunities to showcase what they have learned. In addition, our school also offers a variety of English courses including IELTS, junior form elite English classes, language arts, etc. to cater for students with different learning needs. The school strives to enhance students' bi-literate and trilingual abilities. There are more than 30 enhancement classes on Chinese and English studies for students after school. To help build up an English cum Putonghua-base environment, the school authority will also use English or Putonghua to conduct morning assemblies to students at regular intervals. The school has also arranged to incorporate English vocabulary in some teaching subjects so as to motivate students to use more English in their daily communication. Outsourced professionals are recruited to teach short-term academic programs.
Learning and Teaching Strategies: The school advocates a diverse and student-base teaching model, and encourages interaction among teachers and students. To address learning diversities, the school adopts a strategy by grouping the elite with less capable students so as to create a synergy and help narrowing the learning gap. It would also facilitate the school in nurturing the exemplary learners while maintaining an acceptable standard for those average students. Besides, we kick off the school-based Gifted Education Development, as well as the off-site support or collaboration with other tertiary institutes, so as to preserve the Talent Pool and widen the students' horizons. We infuse extensive reading into curriculum which enables us to foster a reading culture at school. The school flexibly applies information technology and theme-base learning model on teaching. To widen the horizons and exposure of our students, we actively liaise with local and overseas education institutes to organize distance learning programmes, exchange programmes and study tours to maximize their benefits. The school emphasizes teacher development. Apart from sharing different teaching strategies in Staff Development days, we have collaborative preparation periods to promote collaboration between teachers. Teachers participate in lesson studies through which they design lesson plans and teaching resources collaboratively with their colleagues. Through various teacher development measures we keep on striving for improvement in learning and teaching.
School-based Curriculum: 1. Electives: 2X and 3X. Students may choose to take 2-3 elective subjects which may fit their interests and capability. 2. Curriculum highlights: The school seeks to optimize school-base curriculum to fit students' needs. Our initiatives include: modified programme on language arts for students; establishment of school-based database for various subjects; provision of school-based curriculum for Science and Life and Society etc. A task-oriented committee has been set up to source more learning practices, and to organize tailor-made programmes for students to widen and sustain their learning spectrum. Science and Mathematics KLAs have joined the supportive service of "School-based curriculum development section" of EDB for enhancing our Science and Mathematics school-based curriculum. We are working to incorporate elements of STEAM education into our existing curricula under different KLAs. To cope with the development of STEAM education, we have deployed resources to set up the Aviation Lab, Motion Lab, "INSEC" Centre, Aquarium Exploration Centre and Marine Life Touch Tank to provide students with a favorable environment to explore different ideas related to STEAM education. Through participating in STEAM-related projects and competitions, we aim to uplift students' innovation and problem-solving skills. Moreover, the school also has an Aquarium Exploration Centre which contains different coral, marine and amphibian creatures so that we can easily cultivate students' scientific spirit of inquiry and to learn to appreciate the beauty of nature and life. We also hold STEAM Day, various types of STEAM activities, trainings, A.I. courses, V.R. courses and visits for all our students. Those activities allow our students to participate in various types of Mathematics, Science, Art and Innovation technology activities both inside and outside the classroom.
Major Renewed Emphases in the School Curriculum: 1. Reading to Learn: The school library has been expanded to accommodate more modernized facilities such as visual resources centre. We have also launched a Reading Ambassador Scheme to promote reading habit and share reading experiences by specialists and consultants. 2. Utilization of IT in interactive learning: The school actively participates in distance learning and exchange programmes with other education institutes. We aim to shift the regular teaching programmes from classroom to the outreaching platforms to promote self-learning practice, and to let our students know that distance learning is one of the core elements in the New Senior Secondary Academic Structure. 3. Project learning: The school organizes focus groups to promote the good practice of "learning through groups". The focus groups seek to integrate students' brain potential with question-base learning module in an attempt to (i) steer students towards effective learning and (ii) train up their mindset and thinking. 4. Ethical and Civic Education: The school attaches great importance to students' ethical and civil education which have been embedded in the school curriculum. Moreover, a well-organized volunteer team is also in place.
Life Planning Education: Life planning education in our school provides a wide range of opportunities to help our students build up their self-confidence and develop their potentials in order to pursue their life goals. We and the Hong Kong Shing Kung Hui Welfare Council Limited co-organised the Welfare Council's Career Counselling Project in which we invited talents from different professions to share with our students the current trend, prospects and the requirement of entering the corresponding careers.
Student Support
Whole School Approach to Catering for Learner Diversity: 1. Developing the 'Cooperative Learning' mode of teaching to ensure students with diverse learning abilities can supplement each other in the learning process. 2. Lesson plans and assignments are well-designed and tailor-made. 3. We adopt a flexible assessment strategy.
Whole School Approach to Integrated Education: To cater for students with special education needs, the school has established "The Guidance and Learning Support Team" to align with Integrated Education policy. This year, we hire extra teachers, teaching assistants and counsellor to render support to students. The team offers different support measures and services to students. For example, we tailor IEP, provide adjustments for assessments and examinations, we also deploy teaching assistants to offer extra after school learning support.
Education Support for Non-Chinese Speaking (NCS) Students: Our school provides additional support for NCS students to facilitate their learning of Chinese: providing after-school support programmes in learning Chinese; and organising activities to create an inclusive learning environment in the school.
Measures to Provide Adaptation for Learning and Assessment: Apart from two uniform tests and two examinations, students are assessed both during the learning process. Diverse modes of assessment are also employed.

Home-School Co-operation and School Ethos**Home-School Co-operation:**

1. Regular tea gathering for the parents, as well as some parental talks and workshops which they may find useful to strengthen the bond with children.
2. Activities which suit a wide spectrum of parents and teachers.

School Ethos:

Simplicity is the ethos of our school, with emphasis on good discipline and quality teaching. Striving to enhance students' leadership potentials, we have launched a 'Leadership Training Programme'. With the implementation of 'Two Class-teacher System', teachers help to establish a warm and caring environment for our students. Other programmes like 'S.1-S.3 Stay-in Lunch' and 'Rainbow Project' all help students to develop self-discipline, positive values and correct attitude towards life.

Future Development**School Development Plan:**

1. To deepen students' national identity, cultivate global citizenship awareness, and create a positive atmosphere on campus.
2. To enrich diverse learning experiences and broaden students' horizons.
3. To improve the administrative system, optimize the self-evaluation mechanism and improve the effectiveness of learning and teaching.

Teacher Professional Training and Development:

1. Staff development programs are implemented with a focus on curriculum.
2. Seminars and workshops are arranged in response to the whole-school development and major areas of concern.
3. Effective and school-based staff development strategies are introduced.

Life-wide Learning (Including Five Essential Learning Experiences to be Provided through Key Learning Areas, Extra-curricular Activities, Co-curricular Activities, etc.)

A wide range of extra-curricular activities are provided with the categories of spiritual, social, academic, physical, aesthetic, STEAM, interest and community service.

School Facilities**Number of Classroom(s): 24****School Facilities:**

Library, Student Activity Centre, 5 Laboratories, Language Resources Centre, Inquiry-based STEAM Education Centre, STEAM Education Workshop, STEAM in Action Music Chamber, Student Fitness Centre and Micro-teaching Laboratory, Multi-media Reading Resources Centre, MMLC, Cookery Room, Spiritual Education Centre, 2 Computer Rooms, 5 Special Rooms, 2 Basketball Courts, Nishikigoi Pool of Ecology and Aquarium Exploration Centre, LKYMS Café, Ceramics Studio, Aviation Lab, Motion Lab and Marine Life Touch Tank.

Facility(ies) for Supporting Students with Special Educational Needs:

Ramp, Accessible lift and Accessible toilet.

Others

1. Our students participated in the Inter-School Cross Country Competition 2024-25 (Division Three - Area and won the first place in Boys Overall Champion.
2. Our students participated in various territory-wide public athletics competitions, including inter-school and age-group athletics competitions, and won a total of five championship medals in shot put and discus throw events throughout the year.
3. Our students represented the Hong Kong, China athletics team in the "All China Youth Athletics Championships" and broke the 32-year-old Hong Kong Men's U20 4x800m record.
4. Our students won the Robot Skills Challenge championship and the Teamwork Silver Award at the "2024 VIQRC CCK 40th Anniversary Cup & Asia Robotics League Hong Kong Challenge"
5. Our students participated in the third "Language Newspaper Cup" National Essay Contest supported by the Education Bureau. Two students were awarded First Prize in the Hong Kong division and represented the Hong Kong division in the national finals of the competition.

Direct Public Transportation to School

MTR: Kai Tak Station
