School Mission

Being sponsored by the Hong Kong Buddhist Association, the motto "Enlighten with Wisdom, Manifest with Compassion" aims to instil Buddhist values and help students develop moral, intellectual, physical, social, aesthetic and spiritual virtues in a balanced way. We also aim at making students citizens of integrity so that they can apply the knowledge acquired, develop positive values and attitudes towards life and contribute to the society and our home country.

Remarks

To enhance teaching and learning effectiveness, small class teaching has been implemented in core subjects, Reading Lesson, Computer Literacy, STEM and Dream Maker.

S.1 Admission, Orientation Activities & Healthy School Life

Secondary One Admission
Our school will accept discretionary places. Our school will participate in the Secondary School Places Allocation System through central allocation stage (Applicable for admission to S.1 in September 2025). Academic achievement 40%; Interview performance 30%; Conduct and attitude 20%; Extra-curricular activities and awards 10%.
Orientation Activities and Healthy Life
An Orientation Day and a range of bridging courses are offered to provide support to new S.1 students. All S.1 students are invited to join the Navigation Scheme in which big brothers and big sisters from senior form students act as mentors to help them to adapt to secondary school life. The school arranges an Orientation, a Parenting Programme, and a Parent Volunteer Gathering for the parents of new S1 students to strengthen the communication and connection between them and the school. The Health Education Committee has been set up to create a healthy school environment, and to develop students’ healthy habits.

School Characteristics
School Management
School's Major Concerns: 1. Learning and Teaching: Optimize teaching strategies to cater to the diverse learning needs of students, including differences in their knowledge, generic skills, values, and attitudes. 2. Student Development: Nurture students' positive values and attitudes, and develop their strengths and potential.
School Management Organisation: Our school implements school-based management. School policies are student-centred. Functional committees are in place to implement these policies. The PTA and Student Union play the role of enhancing communication between the school, parents and students, improving the operations of the school. All staff meetings are periodically held to discuss and deliberate on school policies.
Incorporated Management Committee / School Management Committee / Management Committee: Our Incorporated Management Committee is comprised of Sponsoring Body Managers, an Independent Manager, a Teacher Manager, an Alumni Manager, a Parent Manager and the Principal. The School Administration Committee, consisting of the Principal, vice-principals, assistant principals and senior teachers, is responsible for the daily operations and the review of school policies.
School Green Policy: Surrounded by greenery, the school is situated in a pleasant environment. The sky garden, sponsored by Environment and Conservation Fund, has been set up to promote a green culture among students and cultivate their interest in gardening. Environmental protection policies such as reducing the use of water and electricity have been implemented. With the concerted effort of both teachers and students, the school was awarded the Bronze award of the 14th Hong Kong Green School Award. The school participated in Solar Harvest, a solar energy support scheme for schools and welfare non-governmental organisations, collaborating with China Light and Power Co Ltd. and Electrical and Mechanical Services Department to install solar panels on the rooftop to harvest solar energy, which is in line with the science curriculum in promoting environmental protection.
Learning and Teaching Plan
Whole-school Language Policy: Our school emphasizes the development of biliterate and trilingual abilities. Small class teaching is implemented for Chinese, Mathematics, English, Reading, STEM and Dream Building across the junior forms. Small-class teaching is adopted in English-speaking lessons taught by 2 NETs to provide students with more opportunities to interact with their teachers and classmates. A variety of language activities are held. In addition, students are encouraged and provided with the opportunity to take part in the Speech Festival and writing competitions. Lunch activities are held in the English Learning Centre, establishing an English-rich environment for students to learn English in an easy and enjoyable way. A wide range of English activities including English Speaking Day, inter-class competitions, film shows and English TV programmes and so on, are organised by the English Extended Learning Activities Team (EELA) to motivate students and boost their confidence in using English. Since academic year 2019/20, the school has adopted English as the teaching medium for Geography and some science subjects in some junior form classes. Commencing in 2022/23, MOI is adopted in some elective subjects in senior forms to provide more options for students.
Learning and Teaching Strategies: 1. Students are divided into sets according to their abilities in English, Chinese and Mathematics so as to maximise teaching and learning efficiency. After-school learning classes and homework tutoring sessions are offered, allowing teachers to make full use of after-school time to conduct various types of learning activities and implement strategies. 2. The subjects Citizenship, Economics and Society, and Life and Society and Business are incorporated into the junior form curriculum to equip students with the knowledge and skills required in the senior secondary curriculum. In senior forms, our school offers subjects belonging to the Arts, Science, and Business streams in order to meet the wide-ranging needs of students. Students can also enroll in Applied Learning courses to explore their career aspirations. 3. Two morning reading lessons are scheduled every week to boost students' reading proficiency. Commencing in 2020/21, the Reading Promotion Team has established a whole school reading programme entitled Readers Dozen, aiming at promoting cross-subject reading and broadening students' horizons. Activities include reading club, readers theatre, book talks and so on, in order to foster a reading culture in the school. 4. Open class observations, teaching demonstration and collaborative lesson planning are held regularly to enhance learning and teaching, and to encourage continuing professional development.
School-based Curriculum: 1. Electives: 2X and 3X. Chinese History, Economics, Ethics and Religious Studies, Geography (CHI/ENG), History, Tourism and Hospitality Studies, Business, Accounting and Financial Studies, Biology (CHI/ENG), Chemistry (CHI/ENG), Physics (CHI/ENG), Information & Communication Technology, Visual Arts, Physical Education, EP (M1), EP (M2) 2. Curriculum highlights: (i) In 2023/24, the 'Dream Maker' program, which teaches knowledge and skills related to sports, IT, creativity, and more, was integrated into the curriculum. This program follows a whole-school approach aimed at nurturing students' diverse interests, exploring their multifaceted potential, and fostering their holistic development.(ii) A new STEM programme has been introduced in the junior forms in order to boost their proficiency in mathematics, science, and technology commencing in 2021/22.(iii) A whole school reading programme called Readers Dozen has been implemented in each level to promote cross-curricular reading in both Chinese and English, spark their interest in reading, and broaden their horizons.
Major Renewed Emphases in the School Curriculum: 1. The school values the importance of character building and moral cultivation. The curriculum design and planning covers five major areas, including moral and civic education, sex education, national security education, values education and voluntary work. With students' best interest at heart, the curriculum includes a wide range of activities, instilling correct values and ethics in the students, strengthening their national identity, broadening their horizons, and turning them into knowledgeable and responsible citizens. The school also encourages students to participate in voluntary work, creating a task force of voluntary workers, which is ingrained in the school culture and helps nurture a caring attitude towards others and the community as a whole. 2. In order to boost students' reading proficiency, two morning reading lessons are scheduled every week. Since 2022/2023, the Reading Promotion Team has implemented the whole-school reading program, 'Readers Dozen'. This program encourages cross-curricular reading in both Chinese and English, with the aim of sparking students' interest in reading and broadening their horizons. 3. The whole school promotes small-scale project-based learning, providing opportunities for students to apply critical thinking skills, creativity, and problem-solving skills in a comprehensive manner. This approach encourages student interaction and collaboration, thereby improving their speaking and writing skills. Additionally, project-based learning in each subject enables students to connect knowledge, skills, positive values, and attitudes through a variety of activities. 4. The school promotes learning through electronic means, enhancing teaching and learning efficacy, keeping up with the current level of technology. Teachers are provided with the appropriate training opportunities to acquire new teaching methods to maximise interaction in class. BYOD policy is also implemented in some classes. A total of around 400 iPads/tablets are at the school's disposal.
Life Planning Education: The Life Planning Committee aims to explore students' interests and aspirations, plan their future, and set personal goals, so that they can plan for higher education or future careers. They help students set their goals at the beginning of the academic year, and subsequently help them review their goals periodically, helping them cultivate self-awareness and tap into their full potential.
Student Support
Whole School Approach to Catering for Learner Diversity: Small class teaching in core subjects is implemented, effectively reducing the student-teacher ratio in order to allow for differentiated instruction, making deep learning possible. A gifted education programme is introduced to provide competent students with more learning opportunities, boosting their knowledge and skill, as well as broadening their horizons and helping them set higher goals for themselves.
Whole School Approach to Integrated Education: Our school is committed to building up an inclusive culture and supporting students with special educational needs with a whole school approach. 1. A Student Support Team, including teachers, a social worker as well as an educational psychologist, is in place to provide support to students and parents with special educational needs. 2.Other supporting members have been recruited including an event officer, a school-based speech therapist and experienced instructional assistants to work collaboratively with teachers in a whole-school approach to support individual students with diverse learning needs. 3. External organizations are invited to deliver appropriate training for students with diverse learning needs.
Measures to Provide Adaptation for Learning and Assessment: Three rounds of examinations are implemented per academic year, in addition to formative assessments comprising daily assignments, quizzes and tests, project learning, learning attitude assessments. Reports and reflective essays are also produced to inform parents of their children's overall performance.

Home-School Co-operation and School Ethos
Home-School Co-operation: 1. The PTA has been set up with the aims of strengthening cooperation between parents and the school, fostering a harmonious atmosphere within the school. By holding a wide variety of activities, such as Parents Classroom, workshops, parent-child activities, school picnics and interest classes, parents are able to integrate into the school community. 2. The PTA funds a diverse range of school activities such as Volunteer Service. They have also established various awards including "Inter-class Academic Improvement Award", "Inter-class Conduct Merit" and "Handing in Homework on time throughout the year Award", to encourage students to strive for excellence. 3. PTA will publish the parent's publications regularly. 4. Every September, class teachers will reach out to the parents by "Sunshine Call", with the aims of establishing a relationship and getting to know the needs of the students. Parent-teacher conferences take place in October, December, and March, where matters e.g. students' academics and conduct are discussed, experience is shared, and school policies are explained to the parents, so that the two parties are in step with each other, enhancing student growth and development.
School Ethos: Our students are modest, receptive to advice and well-disciplined. The school emphasises the development of moral, intellectual, physical, social, aesthetic virtues in a balanced way, aiming to equip students with not only knowledge and skill but also life-long learning habits, so that they can contribute to society. To this end, the school combines both discipline and guidance in its policies, where all teachers are involved in the work of discipline and guidance. Two class teachers are assigned to every class to provide more comprehensive care to the students. All S.1 and S.2 students are required to stay in school for lunch with regular after lunch activities provided.
Future Development
School Development Plan: 1. Learning and Teaching: Optimize teaching strategies to cater to the diverse learning needs of students, including differences in their knowledge, generic skills, values, and attitudes. 2. Student Development: Nurture students' positive values and attitudes, and develop their strengths and potential.
Teacher Professional Training and Development: Three to four full-day professional development seminars and workshops are organised each academic year to enhance teaching effectiveness. Open class observations and Learning Study sessions also take place every year so that teachers can improve through continuing professional development and sharing their expertise with each other, enhancing teaching and learning efficiency.
Life-wide Learning (Including Five Essential Learning Experiences to be Provided through Key Learning Areas, Extra-curricular Activities, Co-curricular Activities, etc.)
1. Activities are organised in various key learning areas annually in the hope of providing students with vibrant learning opportunities, e.g. Reading and Chinese Week, Sports Week, Religion Week, Art Week, Maths and Science Week etc. The Learning Activity Day is designed to encourage the whole school to venture out of the campus into the outside world, e.g. visits to external organisations and overseas trips, to expose students to real-life learning situations and broadening their horizons. 2. To realize their potential and develop their leadership skills, students are encouraged to participate in four main types of cross-curricular activities: Social Service Groups, School Sports Teams, Societies and Interest Groups, and other school events such as Talent Shows and School Outings. 3. To offer a whole-person development programme to students and nurture them the ten priority values and attitudes, the junior-form curriculum includes a course in student growth, whereas the senior-form curriculum dedicates a course to the theme of “living a colourful life through serving the community” , which is conducted through experiential learning, e.g. talks on Life Education, to instill in students important concepts such as the value of life and a positive outlook on life. Through talks and forums, students' moral and civic education as well as national identity can be strengthened. Ample opportunities are provided to students, including a large-scale, Voluntary Work Day, visits to singleton elderly by students, and Flag Days. The establishment of the VNET team also allows for systematic training and learning opportunities through the medium of voluntary work, making students more cognisant of the society they live in and inspiring them to care for others. 4. The school closely collaborates with various external organizations to provide a range of career exploration activities for students, including 'Shape Our Future: WeCan!' and 'Career Live – Work Experience Activity'.
School Facilities
Number of Classroom(s): 30
School Facilities: 1. Wireless campus network has been established, facilitating e-learning using portable electronic devices within the campus. 2. Most classrooms are equipped with Apple TV, computers, interactive whiteboards, e-smart blackboards, and projectors. 3. The school is equipped with a mini school hall, School History Room, Humanities Room, English Learning Centre, Technology and Creativity Zone, Innovation-Science-Art-Centre, Startup Laboratory, The Creative Media Development Centre, Campus TV Broadcasting Centre, Leisure Activities Centre, Gym Room, Performance and Arts Centre, and Meditation Room.
Facility(ies) for Supporting Students with Special Educational Needs: Ramp, Accessible lift and Accessible toilet.
Others
Student Awards Academic performance: 1. Champion in "50th Anniversary Joint School Public Speaking Competition 2023 (Madam Lau Kam Lung Secondary School Of Miu Fat Buddhist Monastery)"; 2. 2nd Place (S1 to S2 English Choral Speaking), 3rd Place (S1 to S2 Chinese Choral Speaking), and numerous awards in Solo Verse Speaking (Chinese, English & Putonghua) in "Hong Kong Schools Speech Festival"; 3. 1st Runner-up in the Hong Kong School Storytelling/Speech Competition 2023, organized by the Confucian Academy.
